

To whom it may concern:

I am writing this to respectfully request that the FCC reject the National Association of Broadcaster's petition 04-160. I currently subscribe to satellite radio (by way of a monthly subscription fee) to receive broadcasts that are not available elsewhere. Satellite radio has provided an opportunity to stay current on various issues, including weather and traffic, when I travel.

The FCC should foster innovation and support choices for the citizen's is serves.

Please do not put limits on programming I can receive on my satellite radio.

Thank you for your attention to this matter.

Sincerely,
Larry Box
